Revision Date: 5/30/2002
Supersedes: 12/6/2001

Technical Data Sheet **T-17A Ribbon Cable Cement Thinner**

The **T-17A Ribbon Cable Cement Thinner** is a specifically designed material formulated to be used as a thinner for the Tepco **T-16A Ribbon Cable Cement**. The solvent combination in T-17A is composed of materials which are compatible with the chemical structure of T-16A.

Small amounts of T-17A thinner can be used to reduce the viscosity of the T-16A Cement to a desired viscosity, thereby having an effect on the tension necessary for separating the finished ribbon cable.

T-17A Ribbon Cable Cement Thinner should be mixed with the **T-16A Ribbon Cable Cement** before application to the insulated wire.
